

Ministry Update

2019 was a good year for
crops in Moldova

Agriculture Missionary Angela Zimmerman continues to work with greenhouse and vegetable growers

Along with providing technical advice during visits with farmers, she also is developing literature to identify disease and pests.

Retired Dairy Farmer Ken Gingrich spent 6 months working with the Dairy Development Project at Dancu Tabita

Part of his responsibilities was to mentor a young man, Vasile, to manage the dairy herd.

Another project was renovating the bunker silo

ОЦЕНКА РАБОТЫ

2020 is starting out to be a difficult year with low soil moisture because of the lack of fall rains and winter snowfall.

The additional complications because of Covid19 is creating uncertainty due to many markets being shut down or extremely limited, and the lack of income in an already struggling economy.

Travel restrictions make it difficult to visit projects and provide specific information and advice to people and organizations we are currently working with.

Getting Involved

- Financial Support - funds are needed to support the ministry- staff, travel, supplies, farmer grants/projects. Funds can be given through Petra Church, sent directly to AgConnect Ministries P.O. Box 631 Gap, PA 17527, or online at agconnectministries.org.
- Prayer - pray that God would continue to provide vision, wisdom and direction.
- Other Resources - consider being a long or short-term agriculture missionary, or joining a trip to provide agriculture education or technical support.

Thank-you to our many financial and prayer supporters. This ministry would not be possible without the support and efforts of many!
